**1. How to operate the big projection screen:**

The remote to turn the projector on is in the media cabinet in the kitchen. The switch to raise and lower the screen is on the east side wall (same side as the door).

**2. To use projector with a computer:**

Use the steps in #1 to turn unit on. Turn on power to the Black Sony Stereo / Receiver unit. Verify the unit is on Video 1. Verify your computer is on. Plug large black cord (the one with 2 screws) into the side of your laptop. Click on the start menu on your computer. Click on “connect to a projector” (should recognize the projector). Once connected, play music, DVD, or your media choice from your computer.

**3. How to play a movie on big projector screen:**

Use the above steps. Turn power on to the Black Sony Stereo / Receiver unit. Verify the unit is on Video 2. Turn power on to the Silver Sony DVD / VHS player. Press play. If playing DVD through your laptop, plug black cord marked “External Audio” into your computer (headphone jack), and the projector cord into your laptop in order to show picture through the projector screen – switch to Video 1.

**4. To use Stereo / To play CD:**

Turn power on to Black Sony Stereo / Receiver. Make sure you have the unit on Tuner for radio and turn to desired station. To play a CD (through your laptop), put Black Sony Stereo on Video 1. Plug black cord marked “External Audio” into your laptop.

**5. To use SmartPhone to play music:**

Turn power on to Black Sony Stereo / Receiver. Verify that unit is on Video 1. Plug into phone the black cord with red twist tie on it (end like a headphone). Play desired music. To adjust the volume, use the turn knob on the Black Sony unit.
